Kavel A - grenslijn 7/5/4/3/7: opmetingsplan landmeter JP Lesaffre van 22 december 1970.

Zie nummering bomen op plan hiernaast:

| Boom | Soort               | Diameter op 1m (cm) | Kruin (cm) |
|------|---------------------|---------------------|------------|
| 1    | Acer pseudoplatanus | 24                  | 500        |
| 2    | Sorbus acuparia     | 24                  | 500        |
| 3    | Betula pendula      | 40                  | 500        |
| 4    | Chamaecyparis sp.   | 30                  | 500        |
| 5    | Chamaecyparis sp.   | 45                  | 600        |
| 6    | Acer pseudoplatanus | 34                  | 600        |
| 7    | Acer pseudoplatanus | 20                  | 600        |
| 8    | Acer pseudoplatanus | 50                  | 700        |
| 9    | Ilex aquifolium     | 23                  | 500        |
| 10   | Chamaecyparis sp.   | 42                  | 500        |
| 11   | Chamaecyparis sp.   | 35                  | 500        |
| 12   | Chamaecyparis sp.   | 30                  | 500        |
| 13   | Chamaecyparis sp.   | 26                  | 500        |
| 14   | Chamaecyparis sp.   | 32                  | 500        |
| 15   | Chamaecyparis sp.   | 45                  | 500        |
| 16   | Chamaecyparis sp.   | 55                  | 800        |
| 17   | Quercus sp          | 55                  | 700        |
| 18   | Pinus wallichiana   | 50                  | 700        |
| 19   | Pinus wallichiana   | 40                  | 700        |
| 20   | Acer pseudoplatanus | 40                  | 400        |
| 21   | Acer pseudoplatanus | 32                  | 300        |
| 22   | Acer pseudoplatanus | 42                  | 500        |
